Steps to install Policy Center

1. Uninstall existing java version, if any, and install **jdk-8u112-windows-x64.exe**

2. Create **JAVA_HOME** environment variables by navigating to ThisPC->Properties->Advanced System Settings->Environment Variables->System Variables:

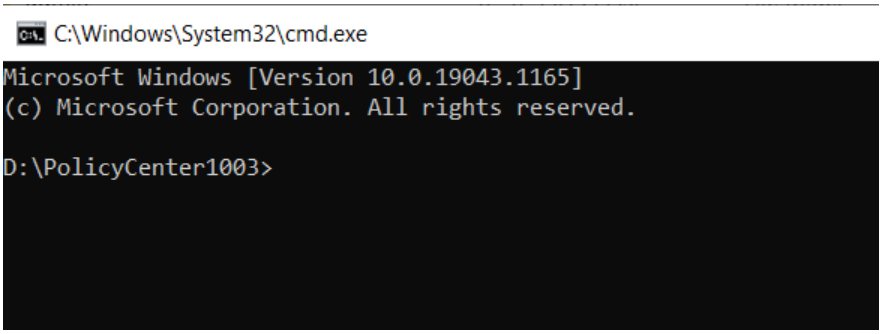

3. Set the **Path** variable to point to bin location of Java :

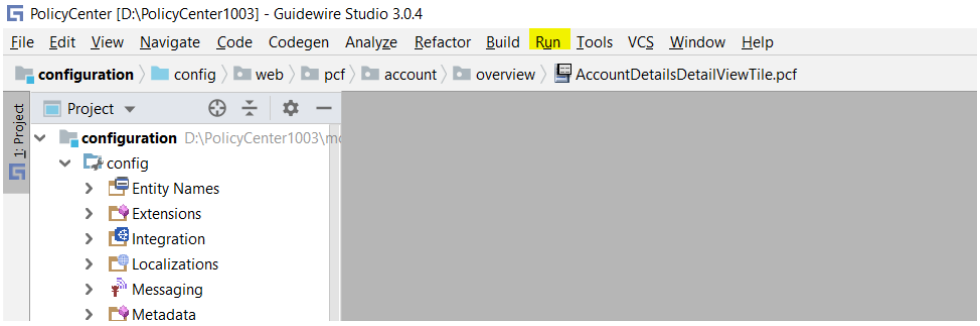

4. Unzip **PolicyCenter1003.zip** to C drive.

5. Open cmd from Policy Center extracted folder and run ***gwb studio***

6. Once the studio is up and indexing is completed, navigate to Run->Run..->Server to run the server:

7. Wait for a message ****Policy Center is Ready**** on server console as below:

```
WARN Server !!! The server is using the Dynamic Code Evolution JVM.  This JVM is
WARN Server
INFO Server.RunLevel ***** PolicyCenter ready *****
INFO org.eclipse.jetty.server.handler.ContextHandler Started o.e.j.w.WebAppConte
INFO org.eclipse.jetty.server.ServerConnector Started ServerConnector@2772adf3{H
```

8. Open a web browser and navigate to below URL:
http://localhost:8180/pc/PolicyCenter.do

9. Login to Policy Center application by entering the login credentials:
    - User: su
    - Password: gw
